

Nepal Village Foundation (UK)

NVFs route to rural development.

The following is the route to achieving sustainable livelihoods and improving development in the target villages for the organisation;

- Step1 Carry out a detailed survey of the villagers in relation to income, work, education and health.
- Step 2 Analyse the survey and use the information to inform planning for the organisation. Consider models of development that are suitable or are known to work elsewhere.
- Step 3 Develop the budget for the proposed project.
- Step 4 Meet with local NGO partners to plan the delivery of services
- Step 5 Visit regularly to monitor progress and identify new areas for development. Carry out a follow up survey to measure progress of the project
- Step 6 Discuss the follow up survey to establish that the project is fit for purpose and to look at alterations and different models to ensure improvement.
- Step 7 Work with the partners to maintain the work in the targeted villages.
- Step 8 Work with the partners to identify other villages and communities to work with based on the work with the first village.
